TaxWise Consultants

Cross-border finance, tax and compliance for companies operating between India and Singapore.

SINGAPORE PRACTICE · 2026 · TWCHARTERED.COM

THE FIRM

The practice today

TaxWise Consultants is a chartered accountancy and finance advisory firm headquartered in Bangalore, with a second office in Chennai. We are the finance and compliance function for companies that would rather not build one in-house.

REGISTERED OFFICE

307, 1st Floor, 14th Main Road, RMV Extension, Sadhashivnagar, Bangalore 560 080

SECOND OFFICE

Chennai

10+

In-house specialists

WHAT WE DO

Three practices, one finance function

01

Core CA Practice

Statutory audit, direct tax, GST and ROC filings. Assessments and representation.

02

CFO Advisory

Management reporting, working-capital control, budgeting, internal controls and board packs.

03

Startup Advisory

Incorporation, ESOP structuring, Rule 11UA valuations, due diligence and fundraise support.

01

Why Singapore

The regional holding seat for Asian operations — and the jurisdiction our clients keep asking about.

The Singapore opportunity

01

Gateway, not destination

A Singapore entity is the holding layer above India, South-East Asia and the Gulf.

02

Rule-of-law premium

Predictable regulation, English-language filing and a deep tax-treaty network.

03

Investor-readable structure

Funds underwrite a Singapore holdco faster than a purely Indian cap table.

The cost of compliance

01

A local hire is a fixed cost

Closing books, filing GST and signing ACRA returns commands a senior Singapore salary.

02

A CFO is out of reach

At this stage a full-time CFO is not a hiring decision. It is a decision to go without one.

03

The work does not scale down

Obligations are the same for a five-person entity as for a fifty-person one. So is the risk.

02

Where TaxWise comes in

We take the whole finance function — books, filings and the CFO seat — and run it from India, for Singapore.

The compliance stack

01	**Bookkeeping & accounting**	Day-to-day ledgers, reconciliations, management accounts and the year-end close.
02	**GST**	Registration, quarterly Form F5 returns and input-tax review.
03	**Income tax**	ECI, Form C-S or Form C, and withholding tax on cross-border payments.
04	**ACRA**	Annual Return, XBRL financial statements, statutory registers and resolutions.

Roughly half the cost

THE DIFFERENCE

50%

Less than comparable local cost

Prepared by our team in Bangalore, reviewed by a Singapore-qualified CA before filing. The difference is structural, not a discount.

- Prepared in Bangalore by a 30-person team.
- Reviewed and signed off by a Singapore CA.
- No salary, CPF, software or recruitment cost.

03

Across the corridor

Most of our clients are not choosing between India and Singapore. They are operating in both.

The India–Singapore corridor

INDIA

Setting up in India

SPICe+ incorporation, PAN and TAN, GST registration, FC-GPR and ROC compliance.

SINGAPORE

Setting up in Singapore

ACRA incorporation, resident director, company secretary, bank account and GST.

FEMA | ODI & FDI | DTAA RELIEF

MOVING MONEY BETWEEN THEM

Repatriation of funds, dividend and royalty flows, transfer-pricing documentation, and FEMA compliance on every leg.

Beyond compliance

01

Mergers & acquisitions

Buy-side and sell-side structuring, financial and tax due diligence, SPA schedules.

02

Valuation

Rule 11UA and FEMA pricing. Independent reports for funding rounds and transfers.

03

Payroll

CPF, IR8A and IR21 in Singapore; PF, ESI, professional tax and TDS in India.

THE FIRM

The team behind the work

01

Chartered Accountants, India

In-house, on our own payroll. Audit, direct tax and GST.

02

Chartered Accountant, Singapore

Reviews and signs off every Singapore filing.

03

Legal

Agreements, SPAs and regulatory correspondence.

04

Company secretarial

Registers, resolutions and board filings, both jurisdictions.

30+ people, all on one payroll. No sub-contracting.

THE FIRM

Technology we build ourselves

01

In-house engineering team

Software engineers on staff, working alongside the accountants.

02

Accounting & tax CRM

Systems built around deadlines, engagements, documents and filings.

03

Custom finance software

Where a finance process needs a tool that does not exist, we build it.

The partners

Every engagement is scoped and reviewed by a partner, not handed to an account manager.
